EXAMINER

WALLACE, SCOTT A

ART UNIT

PAPER NUMBER

2671

DATE MAILED: 09/12/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

# Office Action Summary

Application No.

09/755,902

Applicant(s)

GARRITSEN, FRIDO

Examiner

Scott Wallace

Art Unit

2671

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 26 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 7-10,13,14,17,18,20-24 and 31-40 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 7-10,13,14,17,18,20-24 and 31-40 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

***Response to Arguments***

1. Applicant's arguments with respect to claims 1-40 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 7, 13, 17, 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al., U.S. Patent No. 4,573,199.
4. As per claims 7, 13, 17, 31, Chen et al discloses a method of simulating a second font utilizing a first font (column 2 lines 21-26 and column 7 lines 44-67 and column 8 lines 1-5 and fig 6, #18). However, Chen et al does not specifically disclose the method comprising: stripping a top line and a bottom line from the first font to simulate the second font; wherein the first font comprises an  $n*(m+2)$  font and the second font comprises an  $n*m$  font. Chen et al does disclose deleting lines from a font to create a different size font. It would have been obvious to one of ordinary skill in the art at the time the invention was to delete the top and bottom lines because this would not distort the font as much.

5. Claims 8-9, 14, 18, 32-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al. in view of IBM Tech Disclosure – Font Changer.

6. As per claims 8, Chen et al does not specifically disclose wherein the first font comprises a 9x16 font; and the second font comprises a 9x14 font. This is disclosed by IBM in Font Changer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a 9x16 and 9x14 font, because these font sizes were well known at the time of the invention therefore it would have been obvious to change from one to the other.

7. As per claim 9, Chen et al does not specifically disclose wherein the first font comprises a 8x16 font; and the second font comprises a 8x14 font. This is disclosed by IBM in Font Changer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a 8x16 and 8x14 font, because these font sizes were well known at the time of the invention therefore it would have been obvious to change from one to the other.

8. As per claims 14, 18, 32, Chen et al does not specifically disclose wherein  $m=14$ . This is disclosed by IBM in Font Changer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have  $m=14$  because this font size were well known at the time of the invention therefore it would have been obvious to change from one to the other.

9. As per claim 33, Chen et al does not specifically disclose wherein  $n$  is one of 8 and 9. This is disclosed by IBM in Font Changer. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have  $n = 8$  and 9 because this font size were well known at the time of the invention therefore it would have been obvious to change from one to the other.

10. Claims 10 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al in view of IBM in view of Japan Patent 07191856.

11. As per claims 10 and 34, Chen et al and IBM does not specifically disclose copying the  $n*(m+2)$  font from BIOS into memory. This is disclosed in JP 07191856 in the abstract. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the font in BIOS because this would avoid loss of font data during copying process.

12. Claims 20-24, 35-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al in view of JP 07191856.

13. As per claims 20, 35, 40, 45, Chen discloses the processor emulating a second font utilizing the first font in response to the instructions (column 2 lines 20-26). However, Chen does not disclose a BIOS memory, the BIOS memory storing a first font and instructions; and a processor coupled to the BIOS memory. This is taught by JP 07191856 in the abstract and fig. 1. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the font in BIOS because this would avoid loss of font data during copying process (abstract).

14. As per claims 21, 37, 42, 47, Chen discloses wherein the processor emulating the second font by stripping a portion from the first font in response to receiving an access for the second font (column 7 lines 44-53).

15. As per claims 22, 36, 41, 46, JP 07191856 discloses a first memory coupled to the processor, the processor copying the first font from the BIOS memory into the first memory to emulate the second font (abstract).

16. As per claim 23, Chen does not disclose the portion comprises a top line and a bottom line of an  $n*(m+2)$  font. Chen et al does disclose deleting lines from a font to create a different size font. It would have been obvious to one of ordinary skill in the art at the time the invention was to delete the top and bottom lines because this would not distort the font as much.

17. As per claim 24, Chen discloses the second font comprises an n\*m font (column 7 lines 44-67).

18. As per claims 38, 43, 48, Chen does not disclose wherein the portion comprises a top line of the each character of the first font and bottom line of each character of the first font. Chen et al does disclose deleting lines from a font to create a different size font. It would have been obvious to one of ordinary skill in the art at the time the invention was to delete the top and bottom lines because this would not distort the font as much.

19. As per claims 39, 44, 49, Chen discloses wherein the second font is of two lines of pixels shorter than the first font. Chen discloses deleting lines to reduce the font to another font size depending on the users choice. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, if two lines were chosen to be deleted, then the second font would be two lines of pixels shorter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Scott Wallace** whose telephone number is **703-605-5163**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Mark Zimmerman**, can be reached at 703-305-9798.

**Any response to this action should be mailed to:**

Commissioner of Patents and Trademarks  
Washington, D.C. 20231

**or faxed to:**

**(703) 872-9314 (for Technology Center 2600 only)**

**Art Unit: 2671**

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA,  
Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be  
directed to the Technology Center 2600 Customer Service Office whose telephone number is  
(703) 306-0377.

MARK ZIMMERMAN  
SUPERVISORY PATENT EXAMINER
